Any further assignment will be done by the Roverway Office in Rome at office.roma@roverway.it

Many routes are organised by Italian teams, and it happens quite often that the number of Italian participants reaches the limit set to guarantee a correct ratio between Italians and foreigners. This is done in order to pledge the international "side" of Roverway: a Route, i.e. a Community, with too many Italians wouldn't be easily an "international" community.

This is the reason why some route are "closed" ONLY to Italian participants, but ARE NOT CLOSED to foreigner participants. You can check which routes are eligible for choice in the column named "ALL".
