

### Il clima al campo

#### The Jamboree Climate

On average, the Jamboree site at Hylands Park experiences mild, temperate summers with occasional rainfall. Here are the official July / August averages for East Anglia, courtesy of the UK Meteorological Office:

Jamboree Participants should, however, beware of the British weather! These are averages only – the weather may be much hotter during the Jamboree (over 30 °C) or there may be thunderstorms, rain and strong winds reducing the temperature.

Our advice is to "Be Prepared". Bring both sunscreen lotion and a waterproof coat. Pack a range of clothing that is suitable for either hot sunny weather or cold rainy weather – including sun-hats and boots. A good sleeping bag and waterproof tent will be important as the nights are generally cool and the mornings damp.
